

Innovation Skills

Activities

Using various types of equipment, teams will undertake experiential learning activities that enable them to explore and enhance a multitude of personal skills. Starting with basic skills such as teamwork and communication, they will push their own boundaries to be able to reflect not only on their skills but those of their team mates as well, incorporating 360° reviews. Some of the skills they will explore include:

Problem Solving

Team work

Communication

Leadership

Perseverance

Innovation

Determination

Why Innovation Skills?

These experiential learning activities allow individuals to recognize and use essential work and life skills in practical activities. The group evaluations allows them to honestly reflect on their performance and to identify areas of achievement and for improvement.

Highly effective for individuals that are transitioning between schools Year 6 – 7, or school to FE or employment. Duration- minimum 2 hours to full days
